Journal of Testing and Evaluation
Table of Contents
Volume 23, 1995

No. 1, January

Fracture Toughness by Small Punch Testing—JUDE R. FOULDS, PETER J. WOYTOWITZ, T. KIM PARNELL, AND CHARLES W. JEWETT 3

Dynamic Fracture Toughness (DFT) of Banded HSLA Steels—P. SHANMUGAM, BISWANATH JANA, AND S. D. PATHAK 11

A Method for Generating Fatigue Marker Bands Using a Constant K_{max} Test Procedure—CHRISTOPHER RAGAZZO, RICHARD W. HERTZBERG, AND ROBERT JACCARD 19

Indentation Characterization of Silicon Nitride—WOLFGANG BOLSE AND STATHIS D. PETEVES 27

Metal Surface Preparation by Plasma-Polymerized Films—W. J. VAN OOIJ, A. SABATA, D. B. ZEIK, C. E. TAYLOR, F. J. BOERIO, AND S. J. CLARSON 33

A Universal Panel Tester—THOMAS T. C. HSU, ABDELDJELIL BELARBI, AND XIAOBO PANG 41

Assessment of the Corrosion Behavior of SS 304L in Nitric Acid Environments—An Alternative Approach—VIVEKANAND KAIN, R. C. PRASAD, P. K, DE, AND H. S. GADIYAR 50

Effects of Finishing Treatments on Fabric Friction—JOSEPH O. AJAYI AND H. M. ELDER 55

Technical Note: Two Parameters Characterizing Superficial Mechanical Features—JIABAO LI, XIUYING GAI, ZENGQIAO KANG, AND ZHONGGUANG WANG 59

Technical Note: On the Nonuniform Distributions of Temperature and Thermal Stress in DTA Testing—Y. T. ZHU, J. H. DEVLETIAN, S. J. CHEN, AND A. MANTHIRAM 63

No. 2, March

Development of a Novel Specimen Geometry for Fatigue Testing of Fine Wire—PAUL A. SCHMIDT, ROSS R. BLAIR, AND JAMES C. EARTHMAN 73

Deformation and Fatigue Behavior of Vanadium-Based Microalloyed Forging Steel in the As-Forged and Q&T Conditions—L. YANG AND A. FATEMI 80

Dynamic Strain Aging in a New Single Crystal Nickel-Based Superalloy (CMSX-4)—ABHIJIT SENGUPTA AND SUSIL K. PUTATUNDA 87

Elastic Compliance of Four-Point Bend Specimens Comprising Two Linear-Elastic Materials Bonded with a Thin Layer—J. M. MCNANEY, R. M. CANNON, AND R. O. RITCHIE 95

A Full Field DC Potential Drop Calibration for an Asymmetrically Cracked M(T) Specimen—PETER C. MCKEIGHAN, WU-XUE ZHU, AND DAVID J. SMITH 102

A Quantitative X-Ray Diffraction Technique for Analyzing Sedimentary Rocks and Soils—A. D. BURNETT 111

TOFSIMS Studies of Cleaning Procedures and Silane Surface Treatments of Steels—A. SABATA, B. A. KNUEPPEL, AND W. J. VAN OOIJ 119

A Study of the Fatigue Softening and Hardening of Steel by the Magnetoelastic Effect Method—MU XIANGRONG, MA XINGQIAO, AND ZHUANG YOUQING 126

Monitoring of Cement Stabilized Surrogate Waste Using Resonant Frequency Techniques—SCOTT A. MIRIZZI, T. MICHAEL BASEHEART, LINDA A. RIESER, AND THOMAS E. KRAMER 130

Comparison of Optically and Mechanically Measured Deformations in a Finger-Jointed Wood Tension Specimen—PATRICK J. PELLICANE, RICHARD M. GUTKOWSKI, AND CONRAD JAUSLIN 136

A Vibration-Based Method for Determining St. Venant Torsional and Warping Stiffnesses of Members with Open Cross-Sections—D.-B. LI, Y. H. CHUI, AND I. SMITH 141

No. 3, May

A Consideration of Evaluation of Fatigue Crack Propagation Rate from Effective Stress Intensity Factor Range—CHOBIN MAKABE, HIDEO KANESHIRO, SHIN-ICHI NISHIDA, AND HISASHI SAKIHAMA 153
Calibration of DC Potential Technique Using an Optical Image Processing System in LCF Testing—N. MERAH, T. BUI-QUOC, AND M. BERNARD 160
Relationships between Specimen Size, Stress Rate, and Load-Controlled Tensile Properties of AISI 300 Series Stainless Steels at 4 K—HAE MOO LEE, HAHNGUE MOON, AND SU-LL PYUN 168
An Evaluation of Three Methods to Measure the Dynamic Elastic Modulus of Steel—A. WOLFENDEN AND W. R. SCHWANZ 176
Characterization of Base/Subbase Materials Under Repetitive Loading—DAR-HAO CHEN, M. M. ZAMAN, AND J. G. LAGUROS 180
Evaluation of the Hall Effect Sensor for Pavement Instrumentation—PETER E. SEBAALY, NADER TABATABAEE, AND BOHDAN KULAKOWSKI 189
Influence of Embedded Markers on the Response of the Host Material—SIMEON C. U. OCHI, MICHAEL L. ACCORSI, AND ERIC H. JORDAN 196
Relationships between Tensile Stress Relaxation Behavior and Short-Term Elastic Recovery for Linear Low-Density Polyethylenes—K. PORZUCEK AND J. M. LEFEBVRE 203
A New Technique for Fracture Characterization of Ceramics at Room and at High Temperature—JOSE YGNACIO PASTOR, JAIME PLANAS, AND MANUAL ELICES 209
Evaluation of the Corrosion of $MoSi_2$ by Molten Glass—S. K. SUNDARAM AND R. F. SPEYER 217
Optimization of Lime Content for Fly Ash—PUVVADI V. SIVAPULLAIAH, J. P. PRASHANTH, AND ASURI SRIDHARAN 222
Torsional Fatigue Test for Adhesive Bonded Butt Joints—V. PRAKASH, C. M. CHEN, A. ENGELHARD, AND G. POWELL 228
Technical Note: Crack Initiation Fracture Toughness of Transmission Line Hardware Steels—GHOURI S. BHUYAN 231
Technical Note: Effect of Cold-Bending and Strain-Age-Embrittlement on the Fracture Behavior of CSA G40.21 M 350 WT Steel—GOURI S. BHUYAN 235

No. 4, July

Analysis of the Peel Test: Prediction of Adherend Plastic Dissipation and Extraction of Fracture Energy in Metal-to-Metal Adhesive Joints—ABDULJALEEL K. MOIDU, ANTHONY N. SINCLAIR, AND JAN K. SPELT 241
A Reversing Direct Current Potential Drop System for Detecting and Sizing Fatigue Cracks along Weld Toes—R. YEE AND S. B. LAMBERT 254
Strength Testing of Brittle Materials in Tubular Form Using Elastomeric Inserts—F. R. VANDEPUT 261
A Compact Testing System for Dynamic Fracture Studies—PRABHAKAR R. MARUR, K. R. Y. SIMHA, AND P. S. NAIR 267
Ultra-High-Vacuum Chamber for Environment-Fatigue Testing—J. RUIZ AND M. ELICES 275
Effect of Cooling Rate Variables on the Solidification Time and Microstructure of Permanent Mold Magnesium-Treated Iron Castings—C. S. NARENDRANATH AND MALUR N. SRINIVASAN 281
Analysis of the Coherence of Published Data on Aluminum Matrix Composites—JOHAN ELIASSON AND ROLF SANDSTRÖM 288
A Pneumatic Pressure Bag Testing Machine for Applying a Uniform Load to Panels and Pallets—KURT H. MACKES, JOSEPH R. LOFERSKI, AND MARSHALL S. WHITE 295
A Modified Miniature Disk Test for Determining Material Mechanical Properties—YUANCHAO XU AND ZIQIANG ZHAO 300
Characterizing Shock Absorbers for Ground Vehicle Simulation—ANDREW E. WHELAN 307
Effect of Carbide and Oxide Coating Thickness on Cutting Tool Wear in the Turning Process—JEONG-DU KIM 311
Technical Note: Microcracks: The Hazard Function and Reliability Inspection—LARRY LAWSON AND E. Y. CHEN 315
Technical Note: Stiffening Effects of Photoelastic Coatings on Orthotropic Plates—BLAINE W. TEW, DONALD M. BLACKKETTER, AND RYAN K. LEMMON 319

No. 5, September

Fracture Toughness of Unalloyed Austempered Ductile Cast Iron (ADI)—SUSIL K. PUTATUNDA AND IQBAL SINGH 325
Repetitive- and Single-Blow Impact Testing of Wear-Resistant Alloys—GEORGE LAIRD II 333
Mixed Mode Stress Intensity Calibrations for an Angled Crack Bend Specimen—J. R. YATES, K. F. HO, AND M. R. GOLDTHORPE 341
Development of a Dynamic Load-Deflection Apparatus for Elastomeric Materials—GLENN E. VALLEE AND ARUN SHUKLA 347
Durability Design Process of a Vehicle Suspension Component—YUNG-LI LEE, MICHAEL N. RAYMOND, AND MARK A. VILLAIRE 354
Structure and Outliers in Interlaboratory Studies—JOHN MANDEL 364
Development of a New Accelerated Adhesion Test for Silicone Sealants—A. P. CERRA 370
Elastic Strain, Creep, and Recovery in Mortars: Additional Analysis—LAUREN B. SICKELS TAVES 377
Material Specifications of Advanced Ceramics in Corrosion Studies—R. G. MUNRO 384
A Study of the Variation of Neutron Skyshine Dose with Respect to Roof Thickness, Source Spectrum Distribution—G. PRABHAKARA RAO AND P. K. SARKAR 388

No. 6, November

Prediction of Creep Properties of Chipboard Used in Stressed-Skin Panels—I. ROBERT KLIGER AND PATRICK J. PELLICANE 408
An Analysis of Hot Mix Asphalt Mat Density Measurements—FRAZIER PARKER AND SHABBIR HOSSAIN 415
A Servo-Control System for the Universal Panel Tester—THOMAS T. C. HSU, LI-XIN ZHANG, AND TITO GOMEZ 424
Differential Thermal Analysis of Solid Zirconium—Y. T. ZHU, Y. P. GAO, J. H. DEVLETIAN, AND A. MANTHIRAM 431
Specimen Size Effects on the Diametrical Mechanical Testing of Cylindrical Asphalt Mixes—CHONG-TEIK LIM, SIEW-ANN TAN, AND TIEN-FANG FWA 436
Water Leak Testing of Polyurethane Female Condoms—LESLEY M. NEUNABER, WILLIAM S. BOIVIN, ZAHID H. KHATRI, AND BRUCE A. HERMAN 442
Creep, Shrinkage, and Mortars in Historic Preservation—LAUREN B. SICKELS TAVES 447
Fatigue Strength of Adhesive Bonded Aluminum Joints—A. LINIECKI, T. R. HSU, AND W. LI 453
